Work Experience

Junior Front-End Developer

Freelance-London

December 2025 to Present

In the process of developing a web application for the management of a veterinary clinic, focused on patient administration and medical history tracking.

The application allows the registration and monitoring of animals, billing management, report generation, and the centralization of clinical information to improve internal organization and workflow control.

Mechanical Engineer

The Jordon Group-London

March 2025 to January 2026

- Delivered technical service and troubleshooting for refrigeration systems.
- Developed strong analytical and problem-solving abilities transferable to debugging and resolving issues in web projects.
- Collaborated with teams to solve technical problems under pressure.

Waiter/Barista

Cote Restaurants-London

November 2021 to April 2023

- Strengthened communication, teamwork, and customer service skills in a fast-paced environment.
- Managed priorities and resolved customer issues effectively — valuable for team-based development work.

Maintenance Coordinator

Central Madeirense-Caracas

February 2019 to June 2020

- Led a technical team, managing maintenance operations and service scheduling.
- Developed leadership, organizational, and process improvement skills relevant to collaborative web projects.

Engineering Intern

Empresas Polar-Caracas

July 2018 to December 2018

- Worked on data analysis and asset management improvements using enterprise software (SAP PM).
- Gained experience with technical documentation, reporting, and optimization processes.

Education

Mechanical Engineering (Bachelor's degree)

Simon Bolivar University-Caracas

September 2011 to June 2018

NARIC UK Equivalent: RQF Level 6
